Protocol Summary

Roses are red, violets are blue, use this DatingDapp and love will find you.! Dating Dapp lets users mint a soulbound NFT as their verified dating profile. To express interest in someone, they pay 1 ETH to "like" their profile. If the like is mutual, all their previous like payments (minus a 10% fee) are pooled into a shared multisig wallet, which both users can access for their first date. This system ensures genuine connections, and turns every match into a meaningful, on-chain commitment.

Disclaimer

The Tura11 team makes all effort to find as many vulnerabilities in the code in the given time period, but holds no responsibilities for the findings provided in this document. A security audit by the team is not an endorsement of the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the Solidity implementation of the contracts.

Risk Classification

		Impact		
		High	Medium	Low
	High	H	H/M	M
Likelihood	Medium	H/M	M	M/L
	Low	M	M/L	L

We use the CodeHawks severity matrix to determine severity. See the documentation for more details.

Audit Details

- Commit Hash: e643a8d4c2c802490976b538dd009b351b1c8dda
- In Scope: ## Scope

```
src/
 LikeRegistry.sol
 MultiSig.sol
 SoulboundProfileNFT.sol
```

Executive Summary

Ive learnt a lot from this audit, process was pretty easliy and fast. ## Issues found'

Severity	Number of issues found
High	2
Medium	3
Low	1
Info	0
Gas	4
Total	10

Findings

High

HIGH-01 — Reentrancy in mintProfile allows minting multiple profiles

HIGH-02 — userBalances never updated, ETH permanently locked

MEDIUM-01 — DoS risk from deploying MultiSigWallet on every match

MEDIUM-02 — Centralization risk: owner can delete any user's profile

MEDIUM-03 — burnProfile does not follow CEI pattern

LOW-01 — executeTransaction does not check contract balance

GAS-01 — FIXEDFEE should be constant not immutable

GAS-02 — owner1 and owner2 should be immutable

GAS-03 — Unused Like struct in LikeRegistry

GAS-04 — Unused custom error NotEnoughApprovals
